Summary

B. Tech IT student with hands-on experience in Java, Python, SQL, web and Android development, and data analytics. Strong foundation in DSA, OOP, DBMS, Operating Systems, and Computer Networks, with experience building database-driven applications and Power BI dashboards. Strong problem-solving skills with a keen interest in software engineering and learning new technologies.

Education

MPSTME, NMIMS University

B.Tech in Information Technology, CGPA: 7.5

2024 – 2027

Shirpur, Maharashtra, India

R. C. Patel Polytechnic

Diploma in Computer Engineering, Percentage-78.51%

2021 – 2024

Shirpur, Maharashtra, India

P. B. M. Municipal High School

SSC, Percentage-85.00%

2020 – 2021

Shirpur, Maharashtra, India

Work Experience

InnovationsHub Services Pvt. Ltd.

Jun 2023 - Jul 2023 (45 Days)

Full Stack Web Development Trainee

- Developed web interfaces using HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL through industry-oriented projects.
- Implemented database-driven functionality and contributed to debugging, problem-solving, and project presentations.

Technical Skills

Programming Languages: Java, Python, C++, SQL, PHP

Docker Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Network

Web Technologies: HTML, CSS, JavaScript

Databases: MySQL, Firebase Realtime Database, PostgreSQL, MongoDB, Azure (Basic)

Tools: Android Studio, VS Code, Git, GitHub, Figma, Canva

Data & Visualization: Power BI, DAX, Power Query

Projects

NMIMS Entry Exit QR System | Android Application

- Developed a Java-based Android application for automated student entry-exit tracking using QR code scanning and Firebase.
- Implemented role-based authentication, student registration, QR scanning, and real-time attendance management using Android Studio, XML, Firebase, and ZXing.

Automatic Timetable Generator | Web Application

- Developed a web application to generate conflict-free academic timetables by managing teachers, subjects, and time slots.
- Implemented frontend, backend, and database functionality using HTML, CSS, JavaScript, PHP, and MySQL.

Traffic Accident Risk & Severity Analysis | Power BI

- Developed an interactive Power BI dashboard to analyze accident trends, casualty severity, and high-risk factors using data visualization.
- Cleaned and modeled data using Power Query, DAX, and data modeling to create KPIs, charts, maps, and actionable business insights.

Mental Health Text Classification System | Machine Learning

- Developed a Machine Learning and NLP-based system to classify mental health conditions from text using TF-IDF and multiple classification algorithms.
- Performed text preprocessing, model training, and evaluation using Python, Scikit-learn, SVM, Pandas, NumPy, and Google Colab.

ACHIEVEMENTS & RESPONSIBILITIES

- Secured 3rd Rank in the MPSTME NMIMS Shirpur Hackathon by developing a full-stack web application under competitive conditions.
- Developed real-world software and analytics solutions across Web, Android, Machine Learning, and Business Intelligence using Java, Python, SQL, Firebase, and Power BI.
